Refuel 1.0 FORMAL CPD POINT

Australian Institute of Architects

This CPD seminar entitles you to 1 formal CPD point. Please be aware you are required to manage your own CPD records. We will provide you with your participation certificate and answer sheet once you have attended the full seminar.

WATERMARK COMPLIANCE CONSIDERATIONS – FROM A DRAINAGE PERSPECTIVE

Proudly supported by

Stormtech™

1. What is the current iteration of WaterMark?
2. Is PVC (uPVC) a suitable material for use as a sanitary drain?
3. What is the minimum DN connection for a shower?
4. Can custom drains be manufactured to size?
5. Floor waste gullies shall be installed with an accessible removable grate. True/False
6. Can non-WaterMark sanitary drains be installed?
7. What distance can an untrapped waste be from the riser?
8. What is the minimum DN outlet connection to the trap or discharge pipe for a group of 3 showers?
9. What is the highest pH that aluminium can withstand?
10. What is the smallest DN waste connection for a washing machine?

At the end of this panel, attendees will be able to:

a) Identify code requirements
b) Evaluate practicalities
c) Apply knowledge and troubleshoot problems
d) Identify and define design solutions
e) Evaluate and apply knowledge for the best environmental outcomes

Competency Standard – 4.6.7 Floor waste gullies, 4.6.7.6 Removable grates, 11.17 Showers, 11.17.1 Individual showers
