Refuel 1.0 FORMAL CPD POINT
Australian Institute of Architects

This CPD seminar entitles you to 1 formal CPD point. Please be aware you are required to manage your own CPD records. We will provide you with your participation certificate and answer sheet once you have attended the full seminar.

WATERMARK COMPLIANCE CONSIDERATIONS – FROM A DRAINAGE PERSPECTIVE

Proudly supported by

Stormtech™

1. The Australian Building Codes Board have released an update to the WMTS-040:2016. What is it known by?
2. What common building material is not certified in the latest WaterMark update?
3. Does aluminium corrode in bathroom environments?
4. What are the minimum DN linear drains requirements in NSW?
5. Are adjustable drains available?
6. Can custom drains be manufactured to size?
7. AS3500 is an Australian Standard Plumbing Code?
8. Should builders have approved plumbing products installed?
9. Multiple shower units require larger capacity drains and outlets?
10. 1Floor waste gullies shall be installed with an accessible removable grate?

At the end of this panel, attendees will be able to:

a) Identify code requirements
b) Evaluate practicalities
c) Apply knowledge and troubleshoot problems
d) Identify and define design solutions
e) Evaluate and apply knowledge for the best environmental outcomes

Competency Standard – 4.6.7 Floor waste gullies, 4.6.7.6 Removable grates, 11.17 Showers, 11.17.1 Individual showers
